

# Connect to eduroam on iPhone, iPad or iPod

Follow these instructions to connect your iOS Device (iPhone, iPad, iPod) to the eduroam network.

If you have trouble following the instructions or connecting to the wireless network, please [contact the ITS Service Desk](#) for direct assistance.

## Instructions Apply To:

<b>Devices</b>
<ul style="list-style-type: none"><li>• iPhone, iPad, iPod</li></ul>
<b>Operating System Versions</b>
<ul style="list-style-type: none"><li>• iOS 5 and above</li></ul>

## Step-by-step guide

1. Make sure WiFi is turned on. Select **UNCA\_Setup** from the list of available wireless networks.
2. Open Safari (Other browsers will not work) and visit <https://wifi.unca.edu>. Agree to the *Acceptable Use Policies* and click **Start**.
3. Select **Students, Faculty and Staff** on the *University Affiliation* page.
4. Enter your UNC Asheville credentials and click **Log In**.
5. Select **eduroam** for *Wireless Access* Type and agree to the eduroam Acceptable Use Policy.
6. A wireless network profile will automatically download and prompt you for installation. During installation of the profile you will be prompted to enter passcode.
7. If your device does not automatically switch to the *eduroam* network, select the *eduroam* network from the list of available wireless networks to connect.

You should now have full internet access via the eduroam network, and your device will connect to eduroam automatically whenever you are in range of the network. The security certificate issued will be valid for one (1) year, at which time you will need to re-enroll your device.
